Product Specifications

Industry Applications

Retail & Grocery

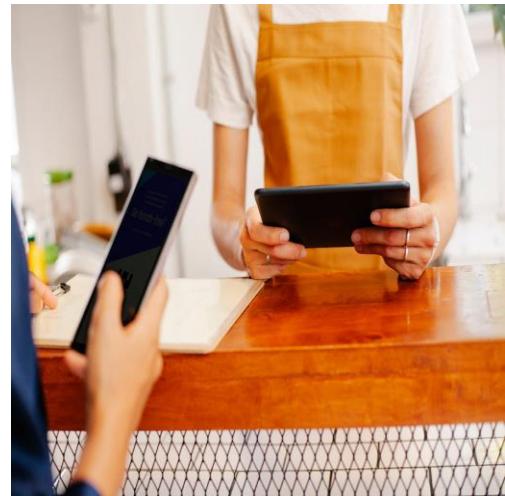

Seamless billing, inventory tracking, and expense management make it ideal for high-volume retail environments.

Restaurants, Cafes & Snack Centres

Features like dine-in management, menu master, and WhatsApp notifications enhance customer service and order accuracy.

Service & Multi-Chain Franchise Businesses

Multi-outlet and franchisee management help streamline operations, track performance, and maintain consistency across branches.

“Simplify your billing, multiply your business”

Feature Overview

Enhanced Dashboard & Analytics

Real-time visual insights with daily performance metrics, sales breakdowns by mode, and best-selling item tracking empower quick, informed business decisions.

Smart Franchise & Expense Management

Automates reorder flow between branches, with transparent dispatch and expense tracking, enabling efficient stock coordination and accurate reporting.

Flexible Billing & Credit Handling

Supports complete bill edits, deletions with logs, customer credit and settlement options, ensuring transparency and smooth financial operations.

Key USPs

All-in-One Platform

Single Android app for billing, inventory, expenses, and reporting — minimizing hardware and training costs.

Industry Agnostic

Flexible architecture allows customization for retail, hospitality, service, and franchise operations.

Smart Automation

Automated reporting and WhatsApp alerts reduce manual effort and improve decision-making speed.

24/7 Customer Support

24/7 Customer Support and training for uninterrupted business operations.

Operational & Customization Enhancements

User Management & Role Permissions

Comprehensive control over access levels for Admins, Cashiers, Managers, and Franchise Owners ensures data security and accountability. Can create unlimited users and fully customizable settings.

Invoice & Print Settings

Supports multiple printer connections — Ethernet, USB, Bluetooth — with customizable options for logo, footnote, rate display, and language printing.

Configurable Interface & User Experience

Flexible screen layouts (4x4 or 8x4 menus), manual rate entry, show/hide dashboard, and multi-language printing options offer adaptability for every business type.

Automation & Smart Operations

Dine-In and Table Management

Manage reservations, live table status, and seating efficiently with color-coded indicators and booking modifications in real-time.

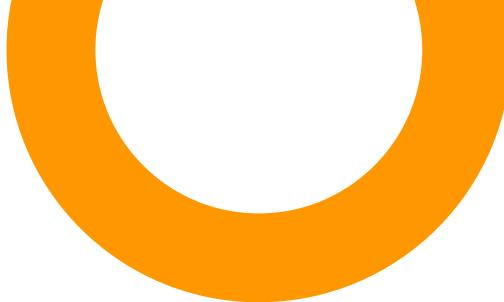

Smart Reports & Insights

Comprehensive reports like Customer Credit Report, Bill Receipt Report, Purchase Report, Expense Report, Inventory Report, and so on enhance visibility and simplify compliance.

Automation for Better Control

Features like restaurant open/close timing, direct bill printing, and QR code on bills minimize manual effort and streamline workflows.
